Understanding GIGW guidelines for website certification Course - *(offered On-line through VC)*

Course objectives

It recommends policies and guidelines for Indian Government website and portals, at any organizational level and belonging to both Central Government as well as State/UT Governments.

It aims at making Indian Government website citizen centric and visitor friendly.

Compliance to these guidelines will ensure a high level degree of consistency and uniformity in the content, coverage and presentation.

These guidelines address common policy issues and practical challenges that Government Departments face during development and management of their websites.

The guidelines aim to assist the departments in ensuring that their website conforms to a consistently high standard.

Course Duration

The duration of course will be of 2 days.

Course contents

Compliance to guidelines

The guidelines have been framed with an objective to make the Indian Government Website conform to the essential prerequisites of UUU trilogy i.e. Usable, User-Centric and Universally Accessible.

These guidelines are based on International Standards including ISO 23026, W3C's Web Content Accessibility Guidelines (WCAG 2.0)

Accessibility

Web accessibility means that people with disabilities can also perceive, understand, navigate and interact with the Web and that they can contribute to the web.

It encompasses all disabilities that effect access to the web, including visual, auditory, physical, speech, cognitive and neurological disabilities.

The impact of persons with disabilities is radically changed on the Web because the Web removes barriers to communication and interaction that many people face in the physical world.

The website and apps should be designed and developed in such a way that they are accessible by all people, whatever may be their hardware, software, language, culture, location or physical ability.

Faculty

The faculties for this program are well qualified having a good experience of visiting all walk of industries for ISMS related activities. They have worked on CQW and S3WaaS projects

Participation

This is an online program. However, not more than 20 participants will be permitted in a course.

About STQC

Standardization Testing and Quality Certification (STQC) Directorate is an attached office of the Ministry of Electronics and Information Technology, Government of India, provides quality assurance services in the area of Electronics and IT through countrywide network of laboratories and centres. The services include Testing, Calibration, IT & e-Governance, Training and Certification to public and private organizations. STQC laboratories are having national/International accreditation and recognitions in the area of testing and calibration. Besides testing and calibration STQC has specialized institutions such as Indian Institute of Quality Management (IIQM) for quality related training programs and Centre for Reliability (CFR) for reliability related services. In the area of IT & e-Governance, STQC provides Quality assurance services for Software testing, Information Security and IT Service Management by conducting testing, training, audit and certifications. In the area of Information Security management, Scheme of STQC is accredited from NBQP a scheme of QCI. We also carry out, Risk Assessment / Gap Analysis (Readiness assessment) for interested organizations as part of their implementation of Information Security system as per ISO/IEC 27001 / ISO/IEC 27002 / ISO/IEC 27003 or any other standard. STQC has a team of competent ISMS auditors / lead auditors duly qualified as per international requirements to accomplish these tasks.
