

Meeting Notice

False Reject Ratio is an important characteristic of biometric device specification published by UIDAI. Compliance with this is mandatory for certification. This testing requires extensive and advance planning. Keeping this in view it is being planned to conduct this test in April 2016.

A half day workshop is being organized by STQC to bring together all the stakeholders and discuss –

- a) Issues related to FRR test plan
- b) Common API compliance testing
- c) New specification being finalized for IRIS on mobile

Venue- STQC Directorate, Electronics Niketan

Date & Time – 22.12.2015, 10AM to 1PM

Interested suppliers are requested to send their intent of participation immediately along with device name, model no, sensor & extractor details to the following person:

Ms. Usha Tanwar

Additional Director
